

REYAVENOCAT

FG GRUP

www.fggrup.com

Reya Venocat offers an innovative treatment standard to reduce the risk of embolism that may occur during thrombolysis and thrombectomy procedures. Reya Venocat, which eliminates the disadvantages of existing treatments, is a complementary product with its ease of use, safety and effectiveness.

1

It reduces mortality and morbidity by eliminating the risk of recurrent pulmonary embolism.

2

It can be easily applied in the patient group where anticoagulant therapy is absolutely contraindicated and in the patient group with serious complications such as thrombocytopenia and major bleeding.

3

It is a 100% recyclable product that minimizes the incidence of complications of permanent filters (breakage, penetration, migration, rupture).

4

It has the advantage of being used as a central venous catheter with its parts and lumens.

5

Easy to apply and extremely safe.
